

POWER SUPPLY UNITS BENCH STAND SOLDERING BITS

U500 SERIES

ST7

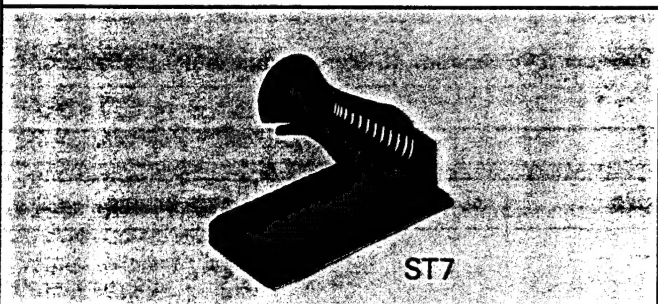

1100 SERIES

POWER SUPPLY UNITS

The Antex U500 and U500-SD are standard and static dissipative versions respectively of a 24V power supply unit. They are for use with the A545 "In-Handle" adjustable temperature controlled soldering iron or 24V versions of the A718 fixed temperature iron (or indeed any other Antex or competitive 24 volt soldering iron up to 50 watts power). With the exception of temperature adjustment or read out, the specifications and dimensions are the same as the U100/U200 series (page 2).

BENCH STAND

The ST7 Industrial Bench Stand has a heavy duty base, sponge, soldering iron spring holder and bezel suitable for any of the Antex irons. Four rubber feet are included, but screw holes are also provided if a permanent fixing to the bench is required. For fume-extraction irons, rotate the bezel 180°.

SOLDERING BITS

REF	STYLE	TIP SIZE (mm)	REF	STYLE	TIP SIZE (mm)
1100		2.3	1105		0.5
1101		3.0	1106		1.0
1102		4.7	1108		3.0
1103		6.0	1109		5.0

NOTE: The above soldering bits are plated with iron and chrome for extra long life. They will fit all the industrial "A" family of Antex irons plus the CS, XSTC, XSD and TCS standard irons. For Desoldering tips please see separate leaflet.
